below, adding a fronted adverbial.

The fire ants drifted into deeper water.

Example: As dawn broke, the fire ants drifted into deeper water.

Monday

Did You Know?

Fire ants are the masters of teamwork and cooperation. When their ant colony is flooded, they float to safety by forming a living raft. The raft is made by the resilient insects locking their legs together. Fire ants are called 'fire ants' because of the intense burning sensation their sting causes.

C-- 1:+ DDC O-- - 1 D-- fe + D1 --- -+

Tuesday Wednesday Thursday Friday

Number Challenge

 Ants are insects. All insects have six legs.

The answer is 6. What was the question?

Can you think of a question that no one else will have thought of?

Critical Thinking

What qualities do you think are essential for someone to be considered a good team player?
