Proofread the following sentence and rewrite with corrections.

There are six stages in the human life cycle: foetus baby, childhood adolescence adulthood and old age

Did You Know?

Every living thing has a life cycle, and each one is wonderfully unique! A life cycle shows how creatures grow, change and reproduce. For example, birds hatch from eggs, develop feathers and eventually achieve flight. Amphibians begin life as tadpoles in water before undergoing a dramatic transformation. Mammals start life inside their mothers, where they are equipped with the necessary nutrients to grow.

Number Challenge

Fact: Life cycle diagrams are often circular.

What mathematical things can you say about a circle?

Critical Thinking

A life cycle is something that goes round and round.

Make a list of things that go round and round.

Example:

Clock hands, gears, ...
