Proofread the sentence below and rewrite with corrections.

Driven by the need to suvive in there icy habitat the penguin's pressed their body against one another.

Did You Know?

Emperor penguins are the ultimate team players. They work together in the extreme cold by forming a gigantic huddle, which is over eighty degrees warmer at the centre than the outside air temperature. Every penguin waits patiently as the huddle slowly rotates, giving each one a turn in the warmest spot. This team effort helps them survive the freezing Antarctic weather and ensures no one is left out.

Number Challenge

Fact: Standing around 120 cm tall, emperors are the largest penguin species.

List the factor pairs of 120.

Example:

12 and 10 are a factor pair because $12 \times 10 = 120$

Critical Thinking

"Teamwork makes the dream work!"

Is this sometimes, always or never true? Why do you think this?
