Rewrite the sentence below, adding possessive apostrophes to the correct places.

The dolphins teamwork skills were a clear sign of their remarkable brains ability to solve problems.

Did You Know?

Dolphins are brilliant hunters, thanks to their highly developed brains! Their cerebral cortex, responsible for planning and problem-solving, helps them strategise and work together to outsmart prey. Bottlenose dolphins are one of the few species, along with apes and humans, that have the ability to recognise themselves in a mirror. They are also among the few animals that have been documented using tools.

Number Challenge

Fact: The weight of a bottle-nosed dolphin's brain is around 1.6 kg.

A bottlenose dolphin's brain is 4 times heavier than a human baby's brain.

How heavy is a human baby's brain?

Critical Thinking

If dolphins ruled the world, how would life on Earth change?
