**Rewrite the sentence below, replacing each underlined adjective with an effective alternative.**

Our breathtaking blue planet is a masterpiece of vast oceans, emerald forests, and towering mountains that teem with extraordinary life.

## Did You Know?

Earth is known as the Blue Planet because over 70% of its surface is covered by oceans. The five oceans – the Pacific, Atlantic, Indian, Southern and Arctic – are rich in marine life and play a crucial role in regulating climate, producing oxygen and supporting ecosystems. However, they face growing threats from pollution, overfishing and climate change.

**Where in the world is the Indian Ocean** Click the [!\[\]\(4b7a79268f6ba26c1471d4232fffa85a\_img.jpg\)](#)

## Number Challenge

**Fact:** Scientists estimate that there are over 1,386,000,000 cubic kilometres of water on the planet

**Write this volume in words.**

## Critical Thinking

**Which is the odd one out and why?**
