Write a descriptive sentence that follows on from the one below.

The polar bear prowled silently across the frozen wilderness, its keen eyes scanning the icy expanse for an unsuspecting seal.

Did You Know?

Predators hunt and eat other animals, known as prey. They play a vital role in nature’s balance. Both have evolved remarkable survival skills – predators excel at stealth and strategy, while prey use clever tactics to escape. Some blend into their surroundings with camouflage, while others rely on speed or agility to evade capture.
