Proofread and rewrite the sentence below so that there are no punctuation, spelling or grammar errors.

The baby crocodile emerged from beneath the sand under there mothers watchful gaze.

Did You Know?

Despite their fearsome reputation, Nile crocodiles are remarkably attentive parents. Females carefully guard their nests and, once the eggs hatch, gently carry their young in their powerful jaws to the water, ensuring their safety. They remain fiercely protective for months, defending their offspring from predators. This surprising tenderness highlights their complex nature – both formidable hunters and devoted caregivers.

Number Challenge

A baby crocodile eats a combination of insects, small fish, and frogs every day. One day, it eats:

- Twice as many insects as fish.
- Three more frogs than fish.
- A total of 23 food items.

How many of each type of food did the crocodile eat?

Critical Thinking

“Never judge a book by its cover.”

How does this famous saying relate to Nile crocodiles?
