Rewrite the sentence below, adding apostrophes to the correct places.

Under the teams watchful gaze, the rhino was airlifted out of harms way, safely suspended beneath the helicopters whirring blades.

Did You Know?

In South Africa, rhinos are sometimes airlifted to safety by helicopter – a challenging operation that requires teamwork and precise planning. This method is used to protect them from poachers (intent on killing them for their horns) and transport them to safer environments. Each mission involves pilots, veterinarians and ground crews, who work together to save the rhinos. It's an incredible example of teamwork for the greater good.

Number Challenge

Fact: In 2024, there were 17,464 white rhinos in the wild.

What mathematical things can you say about this number?

Can you think of something that no-one else will have thought of?

Critical Thinking

Is it right to spend a lot of time and money saving some species from human harm, but not others? Why or why not?
