Create a sentence by rearranging the words below:

The carried grass ants nest blades of to their underground freshly-cut the

Help: Start with the word 'The' and end with the word 'nest'.

Did You Know?

Grasscutter ants are tiny masters of cooperation. They collaborate to transport blades of grass, forming organised lines as they return to their colony. Each individual has a specific role, and together they help sustain and grow their community. Without this coordination, the colony couldn't survive, as every piece of grass plays a crucial part. These ants show how working together can lead to impressive results.

Number Challenge

Fact: A single grasscutter ant can carry 50 times its own bodyweight!

$$12 \times 50 = 600$$

Use the above number sentence to solve the following:

- 1) $50 \times 6 = ?$
- 2) $6,000 \div 50 = ?$
- 3) $1.2 \times 50 = ?$
- 4) $25 \times 12 = ?$

Critical Thinking

"You should always share the workload equally between team members."

Is this always, sometimes or never true? Why do you think this?
