

# Morning Starters: Spring 1 - Woodland Wonders

## Word Challenge

**Copy and correct just the words that have a spelling error:**

extinction	powerfull
beneath	centuary

## Grammar Challenge

Click text to edit 

**Write a sentence about a woodland animal that uses alliteration.**

**Example:** The **w**early **w**orm **w**ove its **w**ay through the **w**et **w**oody earth.

**Help:** Alliteration is the repetition of the same initial consonant sound in closely positioned words or syllables.

## Did You Know?

When snow blankets Britain's woodlands, robins struggle to find worms beneath the frozen ground. Luckily, wild boar, which are making a comeback in the UK after being hunted to extinction in the 17th century, are coming to their rescue. These powerful animals plough up the soil with their snouts, bringing hidden worms to the surface. Their return is great news for the robins and other creatures that depend on this forest feast!

## Number Challenge

**Fact:** In UK woodlands, there are around 400 earthworms per metre square.

**How many earthworms might there be in the area of forest shown below?**

## Critical Thinking

**Which is the odd one out and why?**
